

Security and Surveillance

B2C Setup Document

Version 1.0.0

Contents

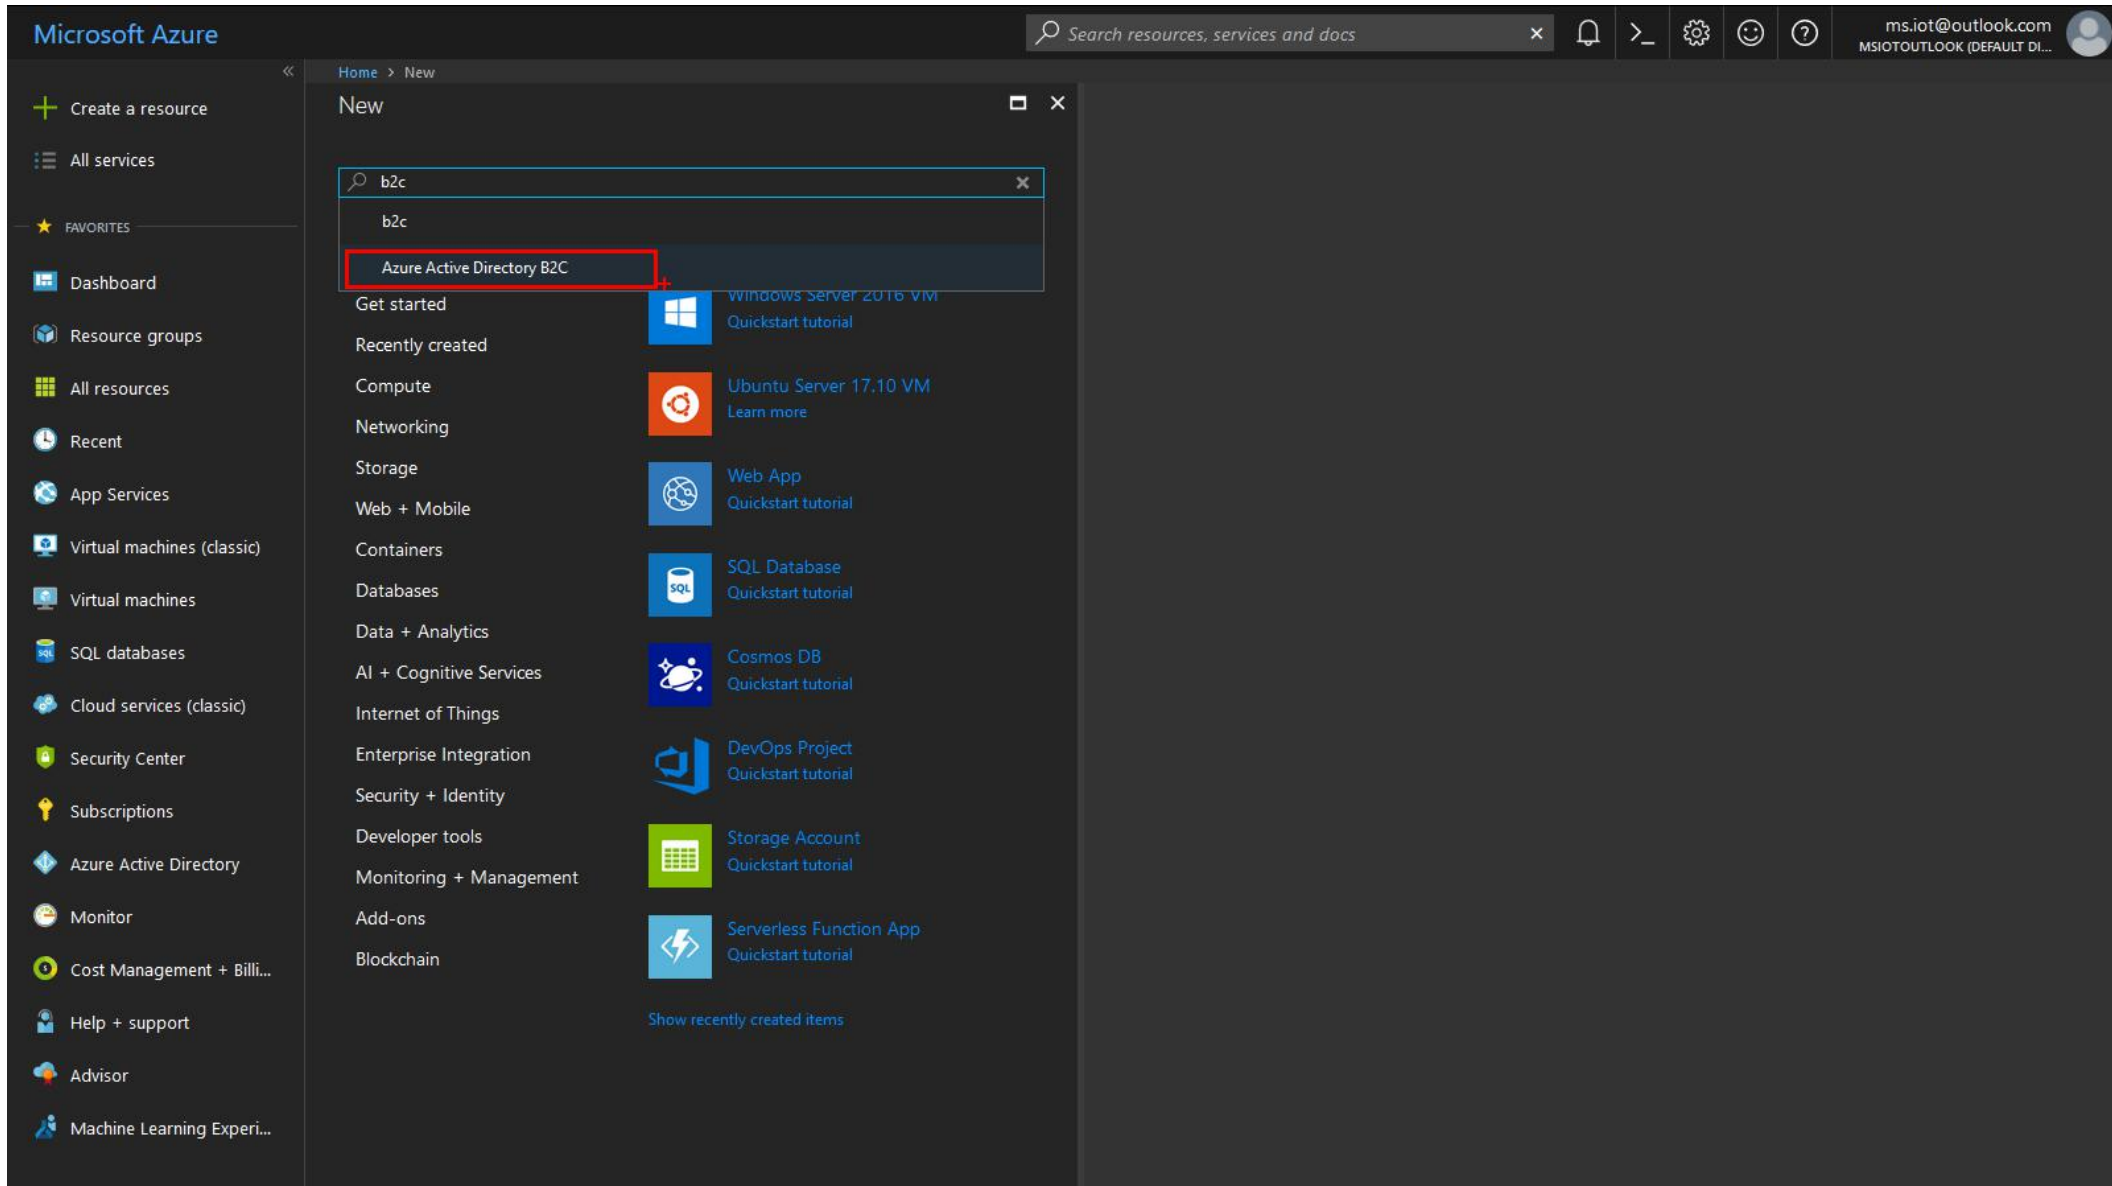

- Configuring Azure AD B2C

About this Document

- This document helps the user to create Azure AD B2C and make it ready to host Security and Surveillance solution. Please note that this step is mandatory before deployment as some of the details acquired in this step would be used during the actual deployment.

Configuring Azure AD B2C

Login to Azure Portal - Creating AAD B2C

The screenshot shows the Microsoft Azure portal interface. The top navigation bar includes the 'Microsoft Azure' logo, a search bar with the text 'Search resources, services and docs', and user information for 'ms.ior@outlook.com'. The left sidebar contains a list of services and favorites, including 'Dashboard', 'Resource groups', 'All resources', 'Recent', 'App Services', 'Virtual machines (classic)', 'Virtual machines', 'SQL databases', 'Cloud services (classic)', 'Security Center', 'Subscriptions', 'Azure Active Directory', 'Monitor', 'Cost Management + Billi...', 'Help + support', 'Advisor', and 'Machine Learning Experi...'. The main content area is titled 'New' and displays a search bar with the text 'b2c'. Below the search bar, a list of services is shown, with 'Azure Active Directory B2C' highlighted in a red box. Other services listed include 'Windows Server 2016 VM', 'Ubuntu Server 17.10 VM', 'Web App', 'SQL Database', 'Cosmos DB', 'DevOps Project', 'Storage Account', and 'Serverless Function App'. Each service entry includes a brief description and a 'Quickstart tutorial' link.

The screenshot shows the Microsoft Azure portal interface. On the left is a navigation pane with various service categories. The main area displays the 'Azure Active Directory B2C' page, which includes a description of the service and a list of features. At the bottom of the page, there is a prominent blue 'Create' button, which is highlighted with a red rectangle. The top of the portal shows the search bar and user profile information.

[https://twitter.com/intent/tweet?text=Just discovered Azure Active Directory B2C is available from Microsoft #Azure Marketplace. And it's now possible to create an AD B2C tenant in the portal and use it for your app without needing any code. Check out this video on how to do that and more info on Azure AD B2C and how to integrate it with your app using the Azure CLI or PowerShell scripts. https://aka.ms/AzureADB2C](https://twitter.com/intent/tweet?text=Just%20discovered%20Azure%20Active%20Directory%20B2C%20is%20available%20from%20Microsoft%20#Azure%20Marketplace.%20And%20it's%20now%20possible%20to%20create%20an%20AD%20B2C%20tenant%20in%20the%20portal%20and%20use%20it%20for%20your%20app%20without%20needing%20any%20code.%20Check%20out%20this%20video%20on%20how%20to%20do%20that%20and%20more%20info%20on%20Azure%20AD%20B2C%20and%20how%20to%20integrate%20it%20with%20your%20app%20using%20the%20Azure%20CLI%20or%20PowerShell%20scripts.%20https://aka.ms/AzureADB2C)

The screenshot shows the Microsoft Azure portal interface. On the left is a dark sidebar with navigation options like 'Create a resource', 'All services', and 'FAVORITES'. The main area is titled 'Dashboard' and shows 'All resources' with a message 'No resources to display'. A search bar at the top right contains the text 'b2c'. A dropdown menu is open below the search bar, showing results categorized by 'RESOURCES', 'RESOURCE GROUPS', 'SERVICES', 'MARKETPLACE', and 'DOCUMENTATION'. Under the 'SERVICES' category, 'Azure AD B2C' is highlighted with a red box. The user's profile 'ms.ior@outlook.com' is visible in the top right corner.

SQL Database

Managed relational SQL Database as a Service

Azure getting started made easy!

Launch an app of your choice on Azure in a few quick steps

Create DevOps Project

Quickstart tutorials

Windows Virtual Machines

Provision Windows Server, SQL Server, SharePoint VMs

Linux Virtual Machines

Provision Ubuntu, Red Hat, CentOS, SUSE, CoreOS VMs

App Service

Create Web Apps using .NET, Java, Node.js, Python, PHP

Functions

Process events with a serverless code architecture

SQL Database

Managed relational SQL Database as a Service

Preserve this for ARM Deployment as "Tenant Name" |
