

# Security and Surveillance

B2C Setup Document

Version 1.0.0

# Contents

- Configuring Azure AD B2C

# About this Document

- This document helps the user to create Azure AD B2C and make it ready to host Security and Surveillance solution. Please note that this step is mandatory before deployment as some of the details acquired in this step would be used during the actual deployment.

# Configuring Azure AD B2C

# Login to Azure Portal - Creating AAD B2C

The screenshot shows the Microsoft Azure portal interface. In the left sidebar, the 'Create a resource' button is highlighted with a red box. The main area displays the 'New' resource page. A search bar at the top of the main area contains the text 'b2c'. Below the search bar, a list of search results is shown, with 'Azure Active Directory B2C' highlighted by a red box. The search results list includes various Azure services such as Windows Server 2016 VM, Ubuntu Server 17.10 VM, Web App, SQL Database, Cosmos DB, DevOps Project, Storage Account, and Serverless Function App. The user's profile and email address (ms.ior@outlook.com) are visible in the top right corner.

The screenshot shows the Microsoft Azure portal interface. On the left is a navigation pane with various service categories. The main area displays the 'Azure Active Directory B2C' page, which includes a description of the service and a list of features. At the bottom of the page, there is a prominent blue 'Create' button, which is highlighted with a red rectangle. The top of the portal shows the search bar and user profile information.

[https://twitter.com/intent/tweet?text=Just discovered Azure Active Directory B2C is available from Microsoft #Azure Marketplace. And it's now possible to create an AD B2C tenant in the portal and use it for your app without needing any code. Check out this video on how to do that and more info on Azure AD B2C and how to integrate it with your app using the new APIs and tools available today. https://aka.ms/AzureADB2C](https://twitter.com/intent/tweet?text=Just%20discovered%20Azure%20Active%20Directory%20B2C%20is%20available%20from%20Microsoft%20#Azure%20Marketplace.%20And%20it's%20now%20possible%20to%20create%20an%20AD%20B2C%20tenant%20in%20the%20portal%20and%20use%20it%20for%20your%20app%20without%20needing%20any%20code.%20Check%20out%20this%20video%20on%20how%20to%20do%20that%20and%20more%20info%20on%20Azure%20AD%20B2C%20and%20how%20to%20integrate%20it%20with%20your%20app%20using%20the%20new%20APIs%20and%20tools%20available%20today.%20https://aka.ms/AzureADB2C)

Create new B2C Tenant or Link to existing Tenant

Create a new Azure AD B2C Tenant

Link an existing Azure AD B2C Tenant to my Azure subscription

Both the steps are mandatory starting with the first one. As first one deals with creation of directory while the other one, linking of created directory with our active Azure subscription

The screenshot shows the Microsoft Azure portal interface. On the left is a dark sidebar with navigation options like 'Create a resource', 'All services', and 'FAVORITES'. The main area is titled 'Dashboard' and shows 'All resources' with a message 'No resources to display'. A search bar at the top right contains the text 'b2c'. A dropdown menu is open below the search bar, showing results under the 'SERVICES' category. The item 'Azure AD B2C' is highlighted with a red box. Other search results include 'Azure Active Directory B2C' and various documentation links. The top right corner shows the user's profile 'ms.iod@outlook.com'.
