

Security and Surveillance

Deployment Document

Version 1.0.1

Contents

- Deploying solution
- Updating B2C reply URLs

About this Document

- This document helps the user to get the Security and Surveillance solution working under user's Azure account.
- The Deployment part, as the name suggests deals with the actual deployment of solution which happens with the help of Azure ARM templates.

Note : Please complete setting up of B2C directory prior to continuing on with this document if not already done so.

Deploy To Azure

Pre-requisites

- Build and package source code of Web app, Backend server etc.
- Upload the packages on Azure blob storage with public container access and get package URLs for the same.

ARM Template Changes

```

AzureResourceGroup1
azuredeploy.json
Schema: https://schema.management.azure.com/schemas/2015-01-01/deploymentTemplate.json#
184 //IoT Hub Variables Start
185
186 "iotHubName": "[concat(parameters('iotHubNamePrefix'),uniqueString(resourceGroup().id))]",
187 "iotHubKeyName": "iothubowner",
188 "iotHubHostName": "[concat(variables('iotHubName'),'.azure-devices.net')]",
189
190 //IoT Hub Variables End
191
192 //Face API Variables Start
193
194
195
196 //Face API Variables End
197
198 //Storage Variables Start
199 "DeployStorageAccountName": "<Placeholder for deployment storage account name>",
200 "DeployStorageAccountKey": "",
201 "WebAppDeployPackageURI": "<Placeholder for Web App deployment package blob URL>",
202 "ComputeEngineDeployPackageURI": "<Placeholder for Compute Engine deployment package blob URL>",
203 "ServerBackendDeployPackageURI": "<Placeholder for REST API App deployment package blob URL>",
204 "SasToken": "?",
205
206 //Storage Variables End
207
208 //Database Variables Start
209
210 //Document DB Variables Start
211
212 "DocDBAccountName": "[concat(toLower(parameters('docDBNamePrefix')),uniqueString('resourceGroup().id'))]",
213 "offerType": "Standard",
214 "DocDBOfferThroughput": "400",
215
216 //Document DB Variables End
217
218 //Web App Variables Start

```

Replace the place holder text with appropriate values of package URLs and storage account details acquired in Step 1.

ARM Template Changes Continued...

- After done with ARM template changes, upload the updated ARM template onto the blob storage and acquire the blob URL for it as done for packages in Step 1.
- Create a deployment URL in the following format (replace the placeholder text with actual values)

https://portal.azure.com/#create/Microsoft.Template/uri/https%3A%2F%2F<storage_account_name>.blob.core.windows.net%2F<container_name>%2Fazuredeploy.json

- Paste the above URL in browser window and hit 'enter'

Updating Reply URLs

- After the deployment succeeds, open the deployment resource group in Azure portal and navigate to web app depending upon the name that you have used as "deployment prefix" with a suffix "webapp" attached along. The web app name should look like

<deployment prefix>webapp with URL

https://<deployment prefix>webapp.azurewebsites.net

- Navigate to your B2C directory and select the application that you have created. And update the reply URL which should be in the format as below:

https://<your web app name>.azurewebsites.net/login

Diagnose and solve problems
Our self-service diagnostic and troubleshooting experience helps you identify and resolve issues with your web app.

Application Insights
Application Insights helps you detect and diagnose quality issues in your apps, and helps you understand what your users actually do with it.

App Service Advisor
App Service Advisor provides insights for improving app experience on the App Service platform. Recommendations are sorted by freshness, priority and impact to your app.

The screenshot shows the Microsoft Azure portal interface. On the left is a navigation sidebar with options like 'Create a resource', 'All services', and various resource categories. The main area displays a 'Dashboard' with a search bar at the top containing the text 'b2c'. Below the search bar, a dropdown menu lists search results categorized by 'RESOURCES', 'RESOURCE GROUPS', 'SERVICES', 'MARKETPLACE', and 'DOCUMENTATION'. The 'SERVICES' category is expanded, and 'Azure AD B2C' is highlighted with a red box. Below this, several documentation links are visible, including 'What is Azure Active Directory B2C? | Microsoft Docs' and various tutorials. On the right side of the main area, a card for 'Azure AD B2C' is displayed, showing its icon and name. The bottom of the page features tiles for 'Service Health', 'Marketplace', 'Linux Virtual Machines', 'App Service', 'Functions', and 'SQL Database'.
